Introduction

This document presents a portrait of all the services and programs of study provided under the umbrella of vocational training. More specifically, it is designed to provide information that complements some sections of the *Education Act* (EA)¹, the *Basic vocational training regulation* (BVTR)² and the *Règles budgétaires de fonctionnement pour les années scolaires 2021-2022 à 2023-2024* (operating budget rules for the 2021-2022 to 2023-2024 school years) (BR).

Divided into five sections, this document covers:

1. Reception, referral, counselling and support services
2. Recognition of prior learning and acquired competencies (RAC)
3. Educational services
4. Student services
5. Evaluation of learning and certification of studies

The document also includes eight schedules with supplementary information.

This tool is available to vocational training centre staff. Private educational institutions holding permits, and colleges authorized to offer vocational training programs leading to a Diploma of Vocational Studies (DVS) or an Attestation of Vocational Specialization (AVS), are also invited to use it.

Vocational training programs

Program offerings in vocational training include some 147 programs of study offered in more than 190 educational institutions as well as over 48 short programs.

Vocational training programs are offered across Québec, depending on the socioeconomic characteristics of each region. The list of programs available is commonly known as the “carte des enseignements professionnels” (vocational training program offerings) and includes some 1 700 ministerial authorizations granted to different school service centres (SSCs) and school boards (SBs).

In addition to the range of official programs of study, continuing training services also include access to “customized” training through SCC and SB business services departments, in order to meet the more specific needs of people in the workforce.

Since 1986, different training paths and mechanisms aimed at student retention and student success have been implemented to facilitate access to vocational training and to meet diverse needs.

The services offered are designed to help client groups access the job market and remain employed, develop job mobility, become independent and participate in the social, economic and cultural development of their communities.

The legislative and regulatory frameworks for vocational training

Vocational training educational services are governed by the BVTR that devolves from section 448 of the EA. They are also linked to reception, referral, counselling and support services, as well as to the recognition of prior learning and acquired competencies, both of which are provided for under the EA (section 250).

Under section 467 of the EA, Québec educational institutions so designated by the Minister receive subsidies for vocational training.

Please note that this document does not constitute a legal interpretation of the cited sections of the EA and the BVTR.

1 Reception, referral, counselling and support services

Reference: EA, s. 250

In accordance with the *Government Policy on Adult Education and Continuing Education and Training* (2002), reception and referral services were enhanced by the addition of counselling and support services. All of these services are now referred to as SARCA (services d'accueil, de référence, de conseil et d'accompagnement [reception, referral, counselling and support services]).

SARCA services are designed to assist adults, prior to their enrolment and/or throughout their studies in general education or vocational training, in choosing and implementing a learning plan in line with their personal and career goals.

This personal plan is based on the learner's personal characteristics and those of their environment, sometimes very explicitly and sometimes, more implicitly. For adults, these characteristics include:

- their acquired learning, cognitive abilities, and physical and mental health
- their fields of interest and their educational and career aspirations
- their family and community responsibilities as well as their economic and career situation
- their perception of the job market and their social and cultural involvement

Drawing up the adult's personal plan and establishing their learning profile requires that all of these elements be taken into consideration. These elements will also be factors in the ongoing update of the personal plan, in accordance with their respective importance and the choices made by the adult. This plan is the cornerstone of the adult's entire training process. Various reference documents provide more details on this subject.

To be more specific, SARCA is an integrated set of services that enable adults to do the following:

Welcome	<ul style="list-style-type: none"> • Clarify and validate what they want. • Assess their situation, learn about the options available to them and what they need to do to develop and carry out their plan.
Information	<ul style="list-style-type: none"> • Obtain information on programs of study, occupations and the job market, on educational resources offered by the SSC or SB and on the various services available in the community while, at the same time, being encouraged and guided to gather information themselves.
Exploration of prior learning and acquired competencies	<ul style="list-style-type: none"> • Obtain an analysis of their school and extracurricular record to situate their prior learning and acquired competencies • Be directed toward the RAC Services (Adult General Education or Vocational Training) or other relevant services. • Assess the feasibility of a future career or training plan.
Vocational orientation	<ul style="list-style-type: none"> • Evaluate, adapt or make career choices in accordance with their situation, their experiences, their aspirations and the job market.
Accompaniment	<ul style="list-style-type: none"> • Receive the support and counselling they need throughout the process, that is, during the various stages of designing and carrying out their plan. • Benefit from support and follow-up actions to reinforce their active commitment to their plan.

The SSCs and SBs are responsible for being proactive and working in partnership in order to reach the public targeted by the *Government Policy on Adult Education and Continuing Education and Training* (2002) and to respond to the orientations of the *Policy on Educational Success: a love of learning, a chance to succeed* (2017).

The funding is provided under the basic allocation included in the **Budget rules (BR)**.

2 Recognition of prior learning and acquired competencies

References: EA, s. 250; BVTR, s. 14

The recognition of acquired competencies (RAC) in vocational training allows individuals to obtain official recognition for learning acquired outside the classroom, i.e. through employment experience or general life experience (volunteer activities, recreation, etc.).

To be recognized, this prior learning must be evaluated on the basis of the competencies set forth in the programs of study that lead to a Diploma of Vocational Studies (DVS), an Attestation of Vocational Specialization (AVS) or a Skills Training Certificate (STC), in accordance with the conditions and criteria set by the Minister. Adults receiving RAC services do not have to fulfill any admission criteria to obtain their diplomas. They must, however, fulfill the requirements for admission to the program of study in order to acquire the missing training declared by an educational institution (classroom-based or distance education courses).

The general and technical framework document *Recognition of Prior Learning and Competencies in Vocational and Technical Training*, and the job analysis report *Prior Learning Assessment and Recognition Advisor*, provide pertinent information on the approach adopted and the tasks to be performed.

These documents are available at: <https://www.inforoutefpt.org/ministere/dossiers>.

3 Educational services

References: EA, ss. 1 and 3; BVTR, ss. 26 and 27

Sections 1 and 3 of the EA and sections 26 and 27 of the BVTR specify the conditions for entitlement to free educational services in vocational training.

In accordance with the **BR**, the student population eligible for grants includes students who, for a given period of attendance, such as from the beginning of September to the end of December, are enrolled in courses totaling at least 15 hours a week, except in cases where the student is completing a program. This provision also applies to persons who were granted recognition for prior learning and competencies.

The educational services offered in vocational training consist of:

- instructional services
- student services

Instructional services are services associated with the acquisition, evaluation and certification of competencies targeted by the programs of study (EA, s. 2). They consist of:

- teaching services
- orientation services (EA, s. 3)

3.1 Teaching services

3.1.1 Admission

References: EA, s. 465; BVTR, ss. 12 and 13

The admission requirements are established by the Minister under section 465 of the EA. The specific prerequisites for each program of study are to be found in Schedule I to this document in the Admission conditions paragraphs that include the phrases, “be at least 18 years of age” and “have the following functional prerequisites.” This information can also be obtained by going to the “Search a training program or an educational organization” page on the InforouteFPT website at <https://www.inforoutefpt.org>.

The SSCs and SBs determine, in accordance with the conditions established by the BVTR, whether an individual requesting admission to a vocational training program satisfies the admission requirements for that program. The SSCs and SBs include in the student’s file the documents supporting the admission to general education and to vocational training, in the case of a concurrent admission.

Certain programs have additional admission requirements. For example, the *Trucking* program (5791) requires that students meet the requirements set by the Société de l’assurance automobile du Québec (SAAQ) so they can obtain a Class 1 driver’s licence. In such cases, the program of study is the definitive reference.

In accordance with the conditions and criteria established by the Minister, the SSCs and SBs may grant recognition for equivalent learning for general education courses certified by another competent authority, thereby allowing the student to satisfy the admission requirements.³

The SSCs and SBs are also responsible for ensuring that students admitted to a vocational training program have sufficient mastery and understanding of the language of instruction to successfully complete their training.⁴

DVS programs that serve as prerequisites for admission to programs of study leading to an AVS are listed in Schedule II and are also available through the “Search a training program or an educational organization” page on the InforouteFPT website at <https://www.inforoutefpt.org>.

The SSC or SB must ensure that the individuals have acquired the learning recognized as equivalent to the DVS prerequisite, or that they practise a trade or occupation related to the particular program of study, in order to comply with the conditions for admission to a program of study leading to an AVS.

Learning recognized as equivalent may be scholastic or experiential. Students will be awarded a DVS for experiential learning only if they have satisfied the specified conditions.

3.1.2 Programs of study leading to a Diploma of Vocational Studies or an Attestation of Vocational Specialization

References: EA, ss. 461 and 463; BVTR, ss. 22 and 23

The vocational training programs and the types of certification (DVS or AVS training paths) provided for in the BVTR are available in Schedules I and II, which also list the programs of study leading to a DVS or an AVS, their admission requirements and the specific prerequisites applicable for the 2021-2022 school year.

Schedule III contains the list of training programs that have been withdrawn. The option to enrol in one of these programs is open only to students who successfully completed one or more courses in a program of study (DVS or AVS) listed in this schedule before June 30 of the school year in which the Minister withdrew the program.

The SSCs and SBs must ensure that students who wish to pursue a Schedule III program of study begun before July 1 of the school year in which the program was withdrawn, and who have passed at least one of the courses in this program, continue to have access to the other courses in the program until June 30 of the year in which it is scheduled to end.

³ Québec, Ministère de l'Éducation, de l'Enseignement supérieur et de la Recherche (2015), *Administrative Guide for the Certification of Studies and Management of Ministerial Examinations: General Education, Youth Sector; General Education, Adult Sector; Vocational Training*, section 6.5. Recognition of Scholastic Learning in Vocational Training.

⁴ Ibid., section 6.7.2. Recognition of the GDT for admission to vocational training.

The SSCs and SBs must, therefore, either:

- 1) continue to offer the program itself
- 2) allow the students to continue their training in a new program of study (where applicable) by determining the appropriate equivalencies
- 3) refer the students to another SSC or SB or to another educational institution that offers the program of study in question

3.1.3 Distribution of programs of study

References: EA, ss. 467 and 472

The document entitled *Carte des enseignements – Les programmes de formation professionnelle et technique* lists the vocational training programs leading to a DVS or an AVS that an SSC or SB is authorized to offer on a permanent or provisional basis during the current school year. Regularly updated information about the authorization of programs of study is available in French on the Inforoute FPT website at: <https://www.inforoutefpt.org/ministere/infoDocs.aspx>.

3.1.4 Vocational training programs subject to a limited enrolment set by the Ministère

Reference: BR

Information about certain vocational training programs subject to a limited enrolment set by the Ministère is presented in Schedule H of the 2021-2022 school year budget rules. This schedule lists the vocational specializations for which the Minister sets a maximum number of students in full-time equivalents (FTE) per SSC and SB for purposes of subsidies.

3.1.5 Permanent authorizations, provisional authorizations, agreements between school service centres / school boards and delocalizations

References: EA, ss. 209, 213, 467 and 472; BR

An SSC or SB that wishes to offer a vocational training program leading to a DVS or an AVS must obtain the Minister's authorization before the training starts. The same applies to requests for agreements between SSCs/SBs or for delocalizations.

To request changes to the *Carte des enseignements (FPT)*, SSCs and SBs must complete the *Formulaire de demande. Autorisations provisoire ou permanente et projet d'entente entre centres de services scolaires ou commissions scolaires ou délocalisation, pour offrir un programme d'études professionnelles*, and submit it to the Ministère in accordance with the procedures established for that purpose. This form is available in French on the Inforoute FPT website at: www.inforoutefpt.org/ministere/infoDocs.aspx.

The Ministère will analyze the requests based on the orientations and criteria provided for in the *Cadre de gestion de l'offre de formation professionnelle et de l'offre de formation collégiale technique*.

Training services

3.1.6.1 Classroom-based courses

Reference: BR

Students who are registered in a classroom-based course attend it for the total amount of time set for the training. Students are deemed to have taken a course for its entire duration if they meet the following criteria: they are present at the beginning and end of the scheduled class time; the difference between the hours of training taken by the students and the time allotment for the course is minimal; and their absences are sporadic.

The training may be given in different settings: in a vocational training centre classroom, in a virtual class (online in synchronous mode) or at a company's premises.

3.1.6.2 Recognition of prior learning and competencies

Reference: BVTR, s. 14

Recognition of acquired competencies (RAC) in vocational training is designed to recognize and validate competencies acquired through employment or different life experiences (see section 2).

RAC enables individuals to obtain official recognition of the competencies they have developed in line with a program of study. The RAC process involves the following steps: initial contact, screening of the application, validation interview, evaluation of competencies that have been mastered and acquisition of those that are missing.

3.1.6.3 Examination only

Reference: BVTR, s. 20

This training service allows acquired competencies to be evaluated without the student having taken the course. It applies to students registered in a program of study who have already acquired the knowledge taught in a given course and want to be evaluated without having to take the course.

3.1.6.4 Retake examination

This training service is available following an evaluation transmitted to the Ministère where the result was unsuccessful. It gives students who did not successfully pass an evaluation the opportunity to improve and be re-evaluated for the same competency.

3.1.6.5 Distance education

Distance education is an activity that, to some extent, involves a separation in space or time⁵ between the teaching and the learning.

⁵ Forget-Dubois, Nadine (2020). *Définitions et modalités de la formation à distance, Études et recherches*, Québec, Conseil supérieur de l'éducation, 18, <https://www.cse.gouv.qc.ca/wp-content/uploads/2020/04/50-2108-ER-Formation-a-distance.pdf>.

It allows students to learn independently and teach themselves, with minimum scheduling or travelling inconveniences, and with the support of resource persons. Distance education refers to correspondence courses with textbooks, course notes or learning guides. With the advent of digital technologies, it now also refers to courses delivered online in asynchronous mode.

3.1.7 Concurrent admission to a vocational training program leading to a DVS or an AVS and to general education

References: BVTR, s. 12, para. 4, ss. 16, 19 and 25; BR

Under the BVTR, concurrent admission to a vocational training program and to general education is one of the four conditions for admission to vocational training.⁶

Individuals are admitted concurrently for one of the following four reasons:

- to complete the general education prerequisites required to obtain a diploma in a vocational training program in which they are enrolled;
- to obtain the credits they are missing to earn a Secondary School Diploma (SSD);
- to complete the general education prerequisites required for admission to college studies;
- to continue their general education in Secondary IV and V subjects in order to reach a higher level, but without obtaining an SSD.

Concurrent admission is designed for individuals in the youth or adult sector who have earned Secondary II, III or IV credits in the three core subjects, namely, language of instruction, second language and mathematics, and who have confirmed their choice of career direction (except for the Exploration of Trades option of the Trades with a Promising Future measure). They will pursue their vocational training at the same time as their general education in Secondary III, IV or V in these subjects that are prerequisites for admission to the vocational studies program in which they are enrolled or, where they have already completed the prerequisites required to obtain a vocational training diploma, in the missing subjects needed for an SSD or for admission to college.

Concurrent admission applies in two different ways:

- **Non-integrated schedule:** The hours devoted to general education (GE) courses are added to a regular vocational training (VT) timetable. In this case, students must register in general education as soon as they are conditionally accepted into the vocational training program and must organize their general education schedule to avoid creating conflict with their vocational training schedule.
- **Integrated schedule:** The general education and vocational training courses are integrated in such a way as to give the student a normal schedule that includes the GE and VT hours. The SSC or SB is responsible for organizing the student's schedule so that the hours allotted to general education account for a minimum of 20% to a maximum of 60% of the student's timetable in a given school year. General education is thus adapted as much as possible to the vocational training being taken.

⁶ Ministère de l'Éducation (2019). *Guide administratif 2020-2021, La concomitance entre la formation générale et la formation professionnelle.*

Additional funding is provided under the BR to offer special support and guidance to students and teaching staff in the case of concurrent admission with an integrated schedule leading to a DVS or an AVS. Students recognized for funding purposes are under 20 years of age on June 30 (or 21 years of age in the case of individuals with handicaps) or are 20 years of age and are continuing in the GE-VT program they started during the previous school year.

3.1.8 Pilot projects for concurrent admission with an integrated schedule to general education and vocational training programs that require Secondary III prerequisites

References: BVTR, ss. 16, 19 and 25; BR

To promote student retention and academic success for the greatest possible number of students at a crucial point in their schooling, concurrent admission with an integrated schedule to general education and vocational training in the youth (GEY) or adult sector (AGE) (measure 13031 of the BR) in Secondary III is henceforth permitted for all DVSs in Category 2, after approval by the Ministère.

Pilot projects for concurrent admission with a GE-VT integrated schedule leading to a DVS are intended for students:

- who were 15 years of age or older on September 30 of the school year in question
- who have already completed the prerequisite Secondary II courses in language of instruction, second language and mathematics
- who have already completed a process that enabled them to validate their choice of career direction and achieve strong vocational maturity

The funding for these pilot projects is the same as for the other forms of concurrent admission with an integrated schedule.

3.1.9 Projects for concurrent admission to general education and vocational training leading to an SSD-DVS double diploma: Trades with a Promising Future and its optional component, Exploration of Trades

References: BVTR, s. 12, para. 4, ss. 16, 19 and 25; BR

The Trades with a Promising Future measure is designed to support the SSCs and SBs in implementing projects for concurrent admission with an integrated schedule leading to an SSD-DVS double diploma.

Optional component: Exploration of Trades

Students who wish to follow a Trades with a Promising Future path but who have not yet confirmed their academic and career choice may enrol in this path that contains an exploration of trades component.

Students enrolled in the Exploration of Trades optional exploration may not receive a DVS while on the component pathway. A maximum of 300 hours or 20 credits, all programs combined, may be completed in vocational training by a student in a lifetime, no matter which SCC or SB they are enrolled in. In this component, enrolments in more than one program of study are permitted in order to facilitate the exploration process.

When students are enrolled in the Exploration of Trades component and are confirming their academic and career choice, they should be supported by a structured academic and career guidance process.

The criteria for admission to the Trades with a Promising Future path and its optional component, Exploration of Trades are set down in the *Guide administratif sur la concomitance entre la formation générale et la formation professionnelle* (administrative guide to concurrent admission). Therefore:

- For students who have confirmed their academic and career choice: The funding of the Trades with a Promising Future path (measure 13032 in the BR) is the same as for the other forms of concurrent admission with an integrated schedule (measure 13031 in the BR), with the exception of the allocation for student support and accompaniment.
- For students who have not yet confirmed their academic and career choice but who want to explore various vocational training programs and, later on, pursue their training in a pathway leading to an SSD-DVS double diploma (Trades with a Promising Future): The funding for their general education component will be the same as if they were enrolled in a regular general education training path.

Additional funding is provided in the BR (measures 13031 and 13032) for support, specific accompaniment for students and teaching staff, academic and career guidance, and student transport.

3.1.10 Provisional bridge between a Training Certificate in a Semiskilled Trade (TCST) and a vocational training program of study leading to a DVS

References: EA, s. 465; BVTR, s. 12, para. 2; BR

Since 2017-2018, the Minister has authorized, under section 465 of the EA, the establishment of a provisional bridge that allows holders of a TCST to be admitted to all programs with Category 2 prerequisites leading to a DVS. To be admitted to vocational training under this provisional bridge to one of these programs, the list of which is contained, for the reader's convenience, in Schedule VII, individuals must satisfy all of the following conditions:

- be at least 16 years of age on September 30 of the school year during which they begin their vocational training
- hold a TCST
- have obtained the required credits in language of instruction, second language and mathematics in Secondary Cycle One in general education in the youth sector or in Secondary II in adult general education

Additional funding is provided for in the BR (measure 13040) to offer special support or supplementary learning activities for the students targeted, or to reinforce support for the vocational training teachers concerned.

Information on the credits recognized for the purposes of admission to DVS programs for which a provisional bridge is available is provided in the official programs of general education in the youth sector and of adult general education, as set out in the pedagogical framework of the Charlemagne system.

3.2 Services supporting the learning process

Reference: BVTR, s. 5

Services supporting the learning process are an extension of SARCA services and pertain to the student's education plan. These services are intended to help the individual establish their learning plan in accordance with:

- their goals
- their personal and work experiences
- their learning needs
- their available resources

4 Student services

References: EA, ss. 1, 2, 3, 6, 110.11, 207.1, 247, 459; BVTR, ss. 6 and 26; BR

Student services are intended to help students make progress in all areas of their learning.

Students under 18 years of age (or under 21 if they have handicaps) are entitled to student services under the *Basic school regulation for preschool, elementary and secondary education*, except for spiritual care and guidance and community involvement services. Guidance services are not part of student services in vocational training because they are provided as SARCA services.

For students 18 years of age or older (or 21 or older if they have handicaps), student services are provided as set out in the *Basic adult general education regulation*, except that, in vocational training, these services are provided free of charge to students enrolled on a full-time basis (i.e. 15 hours or more per week) throughout their training, unless the missing courses needed to complete their training require fewer than that minimum number of hours.

Student services for students 18 years of age or older (or 21 or older if they have handicaps) are designed to help these learners successfully complete their personal and career plan.

Student services consist of three programs: learning support services; counselling, promotion and prevention services; and student life services.

Learning support services	These services provide learning conditions that foster the perseverance and academic and career success of learners.
Counselling, promotion and prevention services	These services promote and encourage the development and maintenance of attitudes and behaviours that have positive effects on learners' overall health and well-being.
Student life services	These services provide a stimulating environment that encourages learners to become committed to their academic and career plan, their learning environment and their community.

The BR for the 2021-2022 school year provide for special funding to improve access to student services for all students. These sums:

- come out of the “Personnel de soutien” component of the funding for educational activities in the vocational training sector.
- come out of the “Allocation de base pour les activités éducatives de la formation générale des jeunes” for students under 18 years of age (or under 21 years of age if they have handicaps).

- come out of the “Allocation pour l’aide additionnelle aux élèves ayant des besoins particuliers” (measure 12040). This measure provides for the hiring or retention of professional and support resources in adult general education or vocational training.
- come out of the allocation intended to promote student attendance and success for young people in vocational training (measure 15043).
- come out of measure 15197, “Accroche-toi en formation professionnelle,” that provides for the hiring or retention of professional and support resources in vocational training. These resources are responsible for accompanying students with specific needs and for supporting teachers accompanying these students in each centre targeted by the measure.

In addition, certain students with a major functional disability may benefit from the Allowance for Special Needs Program—Adults (secondary, college and university), through Aide financière aux études. This program enables students to obtain financial assistance for the various forms of support needed to compensate for the effects of their disabilities and to pursue their studies (e.g. specialized services, adapted transport, housing allowance, material resources).

Under section 110.11 of the EA, in vocational training, the director of a training centre must develop individualized education plans adapted to the needs and abilities of students with handicaps, social maladjustments or learning disabilities, and must do so with the assistance of the parents, the student services staff and the students themselves, unless they are incapable of participating in this process.

The director sees to the implementation and periodic evaluation of the education plan and informs the student’s parents on a regular basis.

Section 42 of Bill 40 amended section 110.4 of the EA so that it now also requires vocational training centres to prepare a plan to counter violence and bullying. The primary objective of this plan is to prevent and counter all forms of bullying and violence directed at students, teachers and any other centre staff members.

5 Evaluation of learning and certification of studies

5.1 Evaluation of learning

References: EA, ss. 110.12, 249 and 463; BVTR, s. 17

In VT, each competency in a program of study is evaluated and the results of the evaluation are expressed as a “pass” or “fail.” Examinations are developed based on the program of study.

To support educational institutions in developing their own examinations, the Ministère provides them with a framework for the evaluation of learning for each new program of study it develops.

For each competency in a program of study, the framework for the evaluation of learning suggests:

- the essential knowledge and performance criteria selected for the evaluation as well as their weighting up to 70 marks out of 100
- one or more pass/fail conditions, if applicable
- the description of the evaluation

The evaluation framework is intended for the persons responsible for the evaluation of competencies in educational institutions, who must upwardly adjust these specifications by 30 marks out of 100.

The Minister sets examinations for some of the competencies in the programs of study. The list of competencies for which the Minister sets examinations appears in Schedule V of this document. The procedures for administering these examinations are set by the Ministère. In addition, the application of these procedures is described in chapter 4 of the *Administrative Guide for the Certification of Studies and Management of Ministerial Examinations*.⁷

As stated in this guide, “For certain vocational programs of study, the Ministère develops evaluation materials for the recognition of acquired competencies (RAC). These carry the same value as the ministerial examinations and must be used by educational institutions.” Schedule VI lists the RAC tools developed by the Ministère.

As stated in this guide, “For certain vocational programs of study, the Ministère develops evaluation materials for the recognition of acquired competencies (RAC). These carry the same value as the ministerial examinations and must be used by educational institutions.” Schedule VI lists the RAC tools developed by the Ministère.

In the case of programs of study for which the Ministère has not developed RAC tools, evaluation is the responsibility of the educational institution unless ministerial examinations have been set for competencies in these programs.

5.2 Certification of studies

References: BVTR, ss. 22, 23 and 25

The Direction de la sanction des études (DSE) is responsible for distributing the ministerial examinations to the educational institutions. Firstly, the DSE publishes an Info-Sanction bulletin informing the educational institutions that new ministerial examinations are available. The persons responsible for the certification of studies in the educational institutions must then request access to the examinations, which are located on the Ministère's secure site. They then receive a decryption code that allows them to download the examinations for a period of one week. The request for access may be sent as soon as the educational institution needs it.

The Minister awards a DVS or an AVS, with mention of the trade or occupation, to persons who have earned all the credits in their program of study.

Credits may be granted as a result of the evaluation of learning or of an evaluation carried out as part of a RAC process.

For a DVS or an AVS to be awarded on the basis of equivalences, a person must be evaluated for at least one of the competencies of the program concerned.

Schedule IV lists the courses outside of the ministerial programs of study for which the Minister issues an achievement record.

Schedule I

List of vocational training programs leading to a DVS, their admission requirements and their specific prerequisites, 2021-2022

Introduction

Schedules I and II contain the list of authorized vocational training programs leading to a DVS or an AVS, by training sector, for the 2021-2022 school year. These lists are presented as tables divided into three sections: program of study, admission requirements and specific prerequisites.

Program of study

This section of the schedule contains the following information, by sector, for each program of study: program number and title, means of evaluation, duration (in hours) and evaluation category.

The means of evaluation indicates how the results are to be transmitted to the Ministère (pass/fail or percentage).

The evaluation category is determined by the amount and complexity of resources that are required to evaluate the program. This factor is taken into account when determining the allocation to be given to the school service centre or school board to offer this program of study (ref.: *Document complémentaire aux Règles budgétaires pour l'année scolaire 2021-2022*) (complementary document to the 2021-2022 school year budget rules).

Admission requirements

This section of the schedule begins with the categories of prerequisites for each program of study. These categories are defined on the following pages.

The table then specifies, as applicable, the level (Secondary III, IV or V) of the credits required in language of instruction, second language and mathematics, in accordance with section 465 of the EA, for persons of at least 16 years of age, as defined in section 12, paragraph 2, of the BVTR, for programs leading to a DVS. The DVS prerequisites for admission to various AVS programs appear in Schedule II.

Under section 14 of the BVTR, admission to a program of study leading to a DVS or an AVS can be granted to persons whose prior learning or acquired competencies are duly recognized as equivalent. Thus, the codes withdrawn from Schedule I remain valid for the purpose of admission to a program even though they no longer appear on the schedule.

Prerequisite categories 1, 2, 4 and 5 list the admission requirements for programs leading to a DVS, as set out in section 12 of the BVTR and, if applicable, those that the Minister has added in accordance with this Regulation and section 465 of the EA. As stipulated in section 12 of the BVTR, a person may be admitted if they meet any of the requirements outlined in paragraphs 1 to 4 of that section.

Prerequisite category 3 corresponds to the admission requirements for programs leading to an AVS, as prescribed by section 13 of the BVTR. Given that neither the prerequisites in language of instruction, second language and mathematics nor the specific prerequisites apply to these programs, the corresponding columns have been left blank.

Category 1

Persons holding an SSD or its recognized equivalent, for example, an Attestation of Equivalence of Secondary Studies, or a postsecondary diploma such as the Diploma of College Studies or a Bachelor's degree

OR

Persons who are at least 16 years of age on September 30 of the school year in which their training is to begin and have earned the Secondary IV credits in language of instruction, second language and mathematics in the programs of study established by the Minister, or have been granted recognition for equivalent learning

OR

Persons who are at least 18 years of age upon entry into the program and have the following functional prerequisites: the successful completion of the General Development Test and the specific prerequisites listed in this schedule for the desired program, or have been granted recognition for equivalent learning

OR

Persons who have obtained Secondary III credits in language of instruction, second language and mathematics in programs established by the Minister and who will continue their general education courses concurrently with their vocational training in order to obtain the Secondary IV credits they are missing in language of instruction, second language and mathematics in programs established by the Minister

Category 2

Persons holding an SSD or its recognized equivalent, for example, an Attestation of Equivalence of Secondary Studies, or a postsecondary diploma such as the Diploma of College Studies or a Bachelor's degree

OR

Persons who are at least 16 years of age on September 30 of the school year in which their training is to begin and have earned the Secondary III credits in language of instruction, second language and mathematics in the programs of study established by the Minister, or have been granted recognition for equivalent learning

OR

Persons who are at least 18 years of age upon entry into the program and have the following functional prerequisites: the successful completion of the General Development Test and the specific prerequisites listed in this schedule for the desired program, or have been granted recognition for equivalent learning

Two specific conditions apply to programs in this category:

Persons who are at least 16 years of age on September 30 of the school year in which their vocational training is to begin in a specific program of study (Schedule VI), who hold a Training Certificate in a Semiskilled Trade (TCST), and who earned the required credits in language of instruction, second language and mathematics in Secondary Cycle One in general education in the youth sector or in Secondary II in general education in the adult sector (see section 8.3).

OR

Persons who are at least 15 years of age on June 30 of the school year preceding their admission to a pilot project involving concurrent general education and practical training, who have attained vocational maturity and who have earned their Secondary II credits in language of instruction, second language and mathematics. By means of concurrent admission with an integrated schedule, they will continue their vocational training and their general education in the youth sector to complete the Secondary III prerequisites they need to obtain their vocational training diploma. Authorization by the Ministère is required for the concurrent admission of a student in Secondary III to Category 2 programs (see section 8.2.1).

Category 3 (for an AVS)

Persons holding a DVS in the occupation corresponding to the program of study or having been granted recognition for equivalent learning

OR

Persons practising an occupation related to this program of study

Category 4

Persons holding an SSD or its recognized equivalent, for example, an Attestation of Equivalence of Secondary Studies, or a postsecondary diploma such as the Diploma of College Studies or a Bachelor's degree

OR

Persons who are at least 16 years of age on September 30 of the school year in which their training is to begin and have earned the Secondary V credits in language of instruction and Secondary IV credits in second language and mathematics in the programs of study established by the Minister, or have been granted recognition for equivalent learning

OR

Persons who are at least 18 years of age upon entry into the program and have the following functional prerequisites: the successful completion of the General Development Test, as well as Secondary V credits in language of instruction in a program of study established by the Minister, or have been granted recognition for equivalent learning

OR

Persons having earned Secondary III credits in language of instruction, second language and mathematics in the programs of study established by the Minister and who will continue their general education courses concurrently with their vocational training in order to obtain the credits they are missing from among the following: Secondary IV and V language of instruction and Secondary IV second language and mathematics in the programs of study established by the Minister

Category 5

Persons holding an SSD or its recognized equivalent, for example, an Attestation of Equivalence of Secondary Studies, or a postsecondary diploma such as the Diploma of College Studies or a Bachelor's degree, and having a good knowledge of Inuktitut

OR

Persons who are at least 16 years of age on September 30 of the school year in which their training is to begin, have a good knowledge of Inuktitut and have earned the Secondary III credits in language of instruction, second language and mathematics in the programs of study established by the Minister, or have been granted recognition for equivalent learning

OR

Persons who are at least 18 years of age upon entry into the program, have a good knowledge of Inuktitut and have successfully completed the General Development Test, or have been granted recognition for equivalent learning

Note: For programs of study in this category, persons may continue their general education courses concurrently with their vocational training provided that they have a good knowledge of Inuktitut and have earned at least the Secondary III credits in language of instruction, second language and mathematics in the programs established by the Minister or they are at least 18 years of age and have successfully completed the General Development Test.

Specific prerequisites

Persons may be admitted to a program of study if they have the functional prerequisites listed in paragraph 3 of section 12 of the BVTR.

The functional prerequisites consist of the successful completion of the General Development Test as well as the specific prerequisites listed in Schedule I. Schedule I lists the course codes for the current programs in general education in language of instruction, second language and mathematics. It also gives the codes for the previous generation of courses⁸ (in parentheses). When a DVS does not require any specific prerequisites in language of instruction, second language or mathematics, a dash (–) appears in the corresponding boxes. For the programs *Santé, assistance et soins infirmiers* (5325) and *Health, Assistance and Nursing* (5825), there are reference notes in parentheses in the appropriate boxes.

Persons are recognized as having the specific prerequisites for a vocational training program if they:

- have already completed, in the adult general education or the youth sector, the courses designated as specific prerequisites for that program of study

OR

- have passed the examinations leading to certification of these courses (the “examination only” measure can apply to the evaluation of specific prerequisites)

⁸ The course codes for the oldest courses remain valid even though they do not appear in Schedule 1.

OR

- have been granted recognition for equivalent learning for the courses designated as specific prerequisites

To identify the specific prerequisites for a program of study, consult Schedule 1, List of vocational training programs leading to a DVS, their admission requirements and their specific prerequisites.

Programs leading to an AVS withdrawn from Schedule II and transferred to Schedule III in 2021-2022:

Sector 01 – 5264 Lancement d'une entreprise

Sector 01 – 5764 Starting a Business

Schedule III
List of withdrawn vocational training programs,
2021-2022

Introduction

This schedule lists the vocational training programs for which school service centres, school boards and educational institutions are no longer authorized to accept new enrolments.

These programs are reserved for those students who began a program of study leading to a DVS or an AVS before July 1, 2021, and who meet the following requirement:

- They have successfully completed one or more courses in a program of study listed in this schedule before June 30 of the school year in which the Minister withdrew the program.

Each program in this schedule is identified by the year it was withdrawn and the year in which it will end. Students already enrolled in one of these programs of study must have finished their studies before July 1 of the year in which it will end in order to be awarded the desired DVS or AVS. Students therefore have four years from the time the program was withdrawn to complete their training.
