

EXPLANATION OF TOOLS: GRAPHIC ORGANIZERS

TOOLS: GRAPHIC ORGANIZERS

Many of the tools developed for *Focus* are in the form of a graphic organizer. A graphic organizer is a visual “instructional tool used to illustrate a student’s or class’s prior knowledge about a topic” or aspects of learning (North Central Regional Educational Laboratory, 2003). Graphic organizers are valuable instructional and learning tools that help teachers and students organize their thoughts, either alone or in a group: before, during and at the end of a learning event. Unlike many tools that have but one purpose, graphic organizers are versatile and provide opportunities for endless applications across various contexts.

PURPOSE OF GRAPHIC ORGANIZERS

In the *Focus* series, students are guided through the learning process by the structure of the graphic organizer tools. These tools are categorized in each *Focus* model unit according to the Cross-Curricular Competencies that they help the student to develop.

HOW TO USE THE TOOLS

The tools were created for teachers and students to use as needed. Each *Focus* model unit provides suggestions for tools. However, teachers and students may choose tools from other sections in order to facilitate their learning. Most of the tools are open-ended enough that they can be used in a wide variety of contexts.

INTRODUCING STUDENTS TO THE TOOLS

When introducing students to a new tool, teachers should describe its purpose, model its use, and provide students with opportunities for practice. Once students become comfortable with using various organizing tools, they will become more independent in their learning processes. As students become familiar with the use of organization tools, teachers can encourage students to create their own organizers.

HOW THE TOOLS CAN BE USED AS PART OF ONGOING EVALUATIONS

These tools allow students to keep track of the processes they engage in during learning activities or when they pursue a line of inquiry. The tools allow students to reflect on their learning processes, strategies, strengths and weaknesses and allow the teacher glimpses into the development of the cross-curricular competencies in each student. As such, they can be used to inform on ongoing evaluation: students can use the tools to reflect and to inform on goals they set for themselves, teachers can use them to identify gaps and plan future interventions with the group or with individual students. The power of graphic organizers is that they allow teachers to assess where their students are in their learning. With the use of graphic organizers, teachers can also determine whether or not students are making connections to prior knowledge.

REFERENCES

North Central Regional Educational Laboratory (2003).

Cross-Curricular Competencies (CCC) are those behaviours, skills, abilities and ways of thinking that allow us to function fully in society. These competencies are drawn upon on a daily basis and can be seen as multi-facets of a single prism - that of human activity. Often, the CCCs are referred to as the competencies necessary for lifelong learning. It is important to note that the CCCs cannot be developed in isolation but are in fact developed through the subject-specific competencies and related complex tasks.

There are 9 Cross-Curricular Competencies in the Quebec Education Program:

CCC1: Uses Information

CCC2: Solves Problems

CCC3: Exercises Critical Judgment

CCC4: Uses Creativity

CCC5: Adopts Effective Work Methods

CCC6: Uses ICT

CCC7: Achieves His/Her Potential

CCC8: Cooperates With Others

CCC9: Communicates Responsibly

Intellectual CCC: To Exercise Critical Judgment

(Student's Name)

demonstrates competency development in a variety of contexts. ▼

Key Features	In the classroom...	Context 1 ▾	Context 2 ▾	Context 3 ▾
Forms an opinion <ul style="list-style-type: none">▶ Defines the question under consideration. Weighs the logical, ethical or aesthetic issues involved▶ Goes back to the facts, verifies their accuracy and puts them in context▶ Looks at various options and considers existing or possible points of view▶ Bases his/her opinion on logical, ethical or aesthetic criteria▶ Adopts a position	The student is called upon to make judgments in many contexts which include moral and ethical issues, appreciation of arts and literature, and problem-solving situations. While the student realizes that there may be many ways to view the issues, he or she takes an informed position that is based on analysis and well-established criteria rather than conjecture			
Expresses his/her judgment <ul style="list-style-type: none">▶ Articulates and communicates his/her viewpoint▶ Justifies his/her position	The student is able to express his or her position clearly and to explain his or her reasoning to others.			
Qualifies his/her judgment <ul style="list-style-type: none">▶ Compares his/her opinion with those of others▶ Reconsiders his/her position▶ Evaluates the respective influence of reason and emotion on his/her approach▶ Recognizes his/her biases▶ Repeats the whole exercise if necessary	The student understands that his or her opinions can be influenced by a range of thoughts, emotions and external factors. He or she is increasingly aware that many issues are more complex than they first appear and that making a judgment goes beyond stating what one likes or dislikes. After hearing the views of others, the student is ready to re-evaluate his or her position.
